COMPANY COMMITMENT

We focus to offer maximum flexibility to meet our customers' needs, to provide the best operating reliability and assistance over the years.

OPERATING FIELDS

We are market leader for fuel gas compression packages for power generations plants.

Furthermore, we also have a wide expertise in the Oil&Gas upstream & midstream, Chemical, Petrochemical, Refrigeration, Renewable Energy and Biogas market. We operate in Public and Industrial market, like district heating, textile, food & beverage and pharmaceutical.

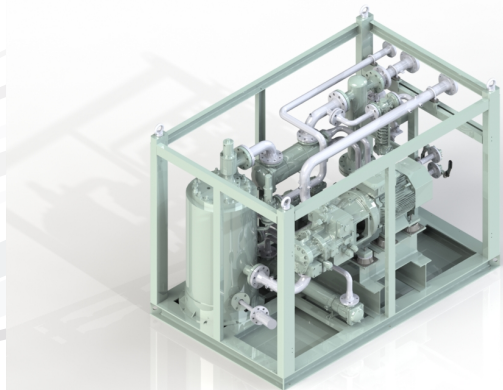

To complete our products range, we developed compressor solutions for Helium and Hydrogen, as well for the LNG market Onshore, Offshore and Marine applications.

STANDARD AND CERTIFICATIONS

As an ISO 9001:2015 certified company, we pride ourselves on the quality of our people and products. ISO 9001:2015 certification is in place to continually improve our quality.

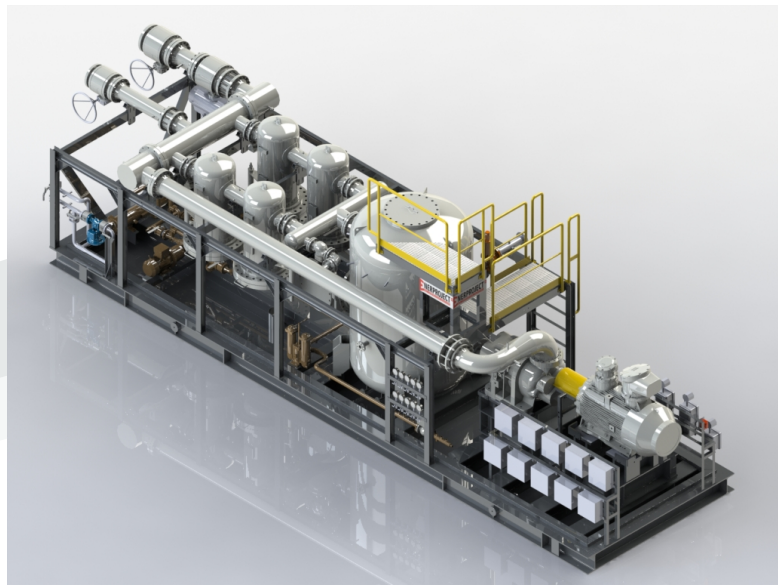

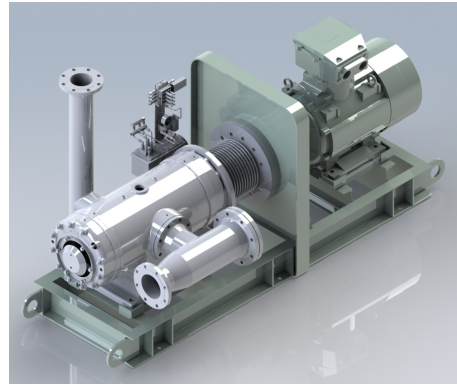

We can design our packages in accordance with any standards (API, EN Standards,...) and we can provide marine class approvals from any certification body such as DNV-GL,BV, ABS, KR, Lloyd, etc.. Enerproject SA choose to engage to offer solutions studied ad hoc based on the specific needs of the customer.

PRODUCTS

- FUEL BOOSTERS FOR POWER GENERATION
- COMPRESSORS FOR O&G APPLICATIONS
- GAS COMPRESSORS FOR SPECIFIC APPLICATIONS
- CHILLER AND REFRIGERATION COMPRESSORS
- BIOGAS COMPRESSOR SOLUTIONS
- BOIL-OFF GAS (BOG) COMPRESSOR SOLUTIONS

We do work with any kind of fluid (ammonia, propylene, natural gas, associated gas, ...) under any kind of fluid quality conditions.

TEAM

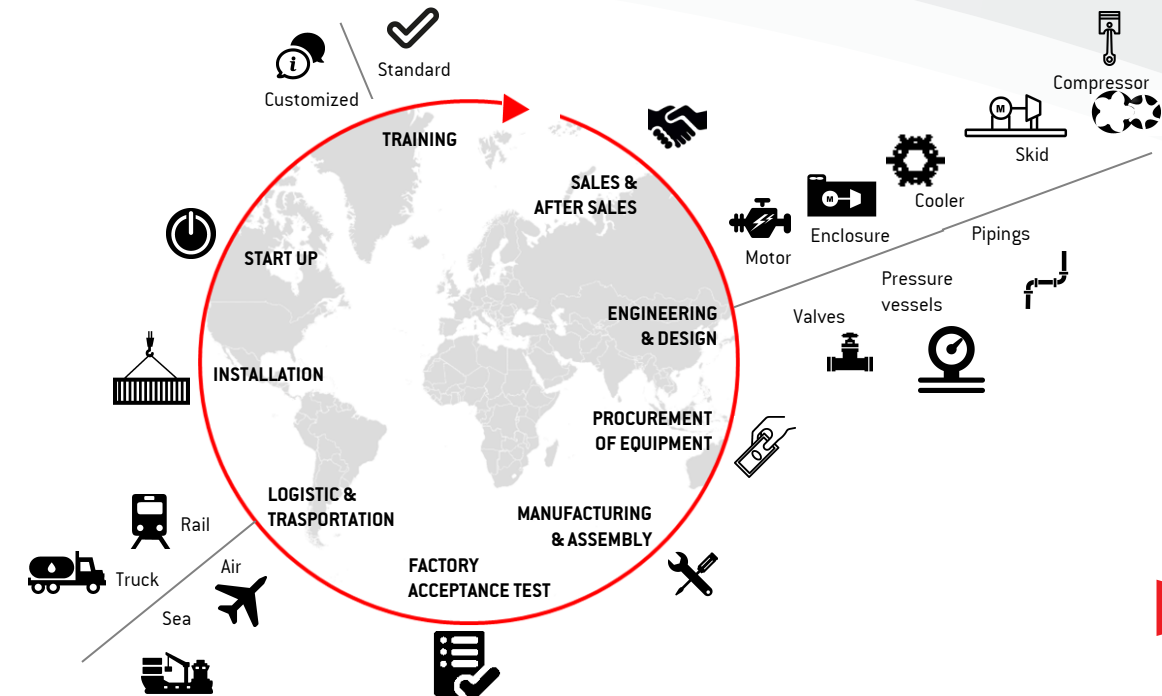

We have proudly preserved our nature as a family run business and our friendly working environment while gaining the size and prominence of an international company.

Our company's skills are:

- international standard systems
- young and talented team
- extensive knowledge in mechanics and electrics
- controls and manufacturing
- logistics and transport
- consulting and management

SERVICES

We support our Customers throughout the entire development of the project, starting from a free consultation up to the installation and after-sales services. We provide customized solutions for the training of personnel. Lower maintenance costs and improved process operations are only a few of benefits you can achieve when your personnel is well trained.

UNITS RANGE

Years of experience enable Eneprojects Engineers to study case by case and to offer the most appropriate solution.

	Flow range [Nm ³ /h]	Pressure range [bar]
ROTARY VANE UNITS	4'000	12
RECIPROCATING UNITS	50'000	250
SCREW UNITS	100'000	60

REFRIGERATION UNITS: we can offer packages up to 10'000 kW of cooling capacity.
